World Pneumonia Day 2022

Increasing Access to Medical Oxygen: Leveraging COVID-19 Support

Hamish Graham, November 2022

Pneumonia Tools: old and new

Oxygen

Tedros Adhanom Ghebreyesus [@DrTedros](#) · Oct 24
Many countries don't have enough oxygen available to assist sick patients as they struggle to breathe. The oxygen project reflects WHO's commitment to end-to-end solutions and innovation to do what we do better, cheaper and to reach more people. #COVID19

One critical lesson

■ CONCLUSIONS

Improving patient outcomes always hinges on doing the basics well. The COVID-19 pandemic offers the opportunity to refocus efforts on the basics of acute care, knowing that improvements in oxygen (as well as infection control, triage, laboratory testing, etc.) will benefit patients both now and in the future.

Three things to do better

1. Solutions to fit Need and Context

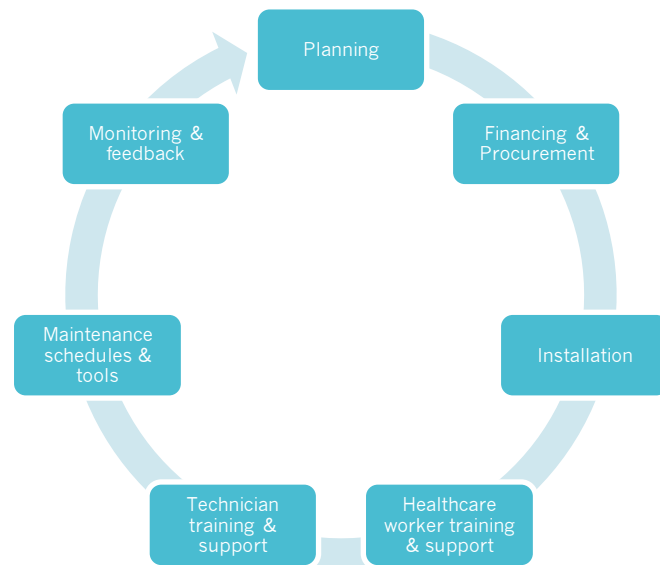

Three things to do better

1. Solutions to fit Need and Context
2. Support the People

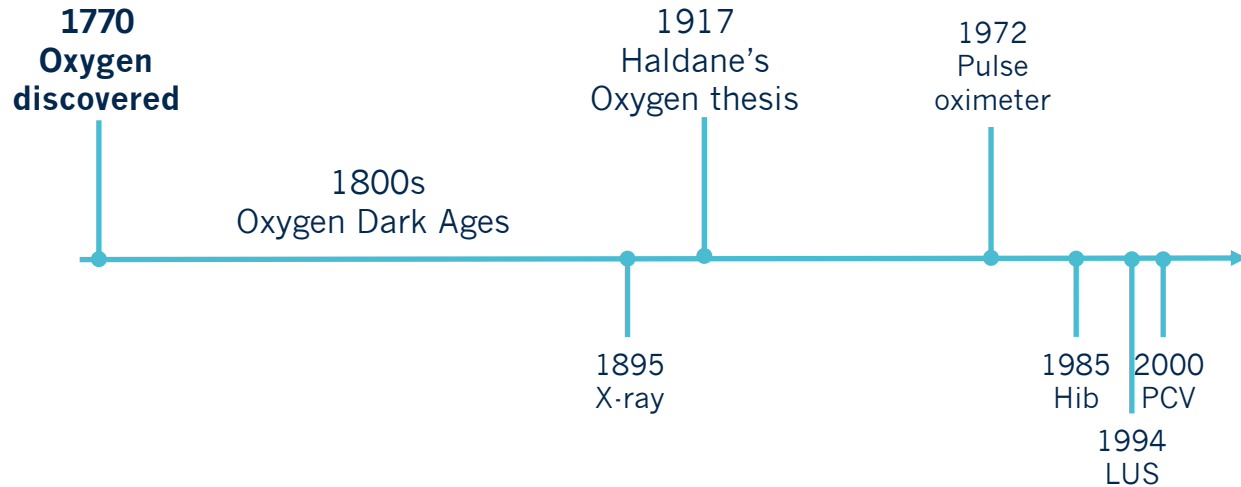

Three things to do better

1. Solutions to fit Need and Context
2. Support the People
3. Think long-term
